Why choose TorusHaler

- It has a modular design, with a customisable outer case. It may be printed with the commercial name of the drug, batch number and expiry date.
- It uses an optimized and market-tested gearbox to ensure the optimal therapeutic dose delivery
- It is patient friendly - easy to grip and carry, easy to use and highly efficient as it requires a low force to operate.
- It is suited with an incorporated dose counter to help accurately monitor the dose intake and show the patient when a replacement is needed.
- Manual or automated assembly is possible

TorusHaler is a **multi dose Dry Powder Inhaler**. It uses an aluminum foil blister strip containing the dosages required by a patient during a period of one month (30 calendar days).

*This device cannot be sold to Russia and CIS countries due to exclusive contracts with customers

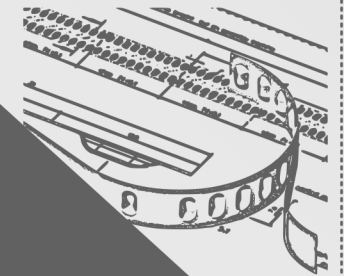

Mematec Solutions

Who Are We?

We design and develop inhalation medical devices used in the treatment of COPD – Unit Dose and Multi Dose DPIs.

We also offer Consulting and Project Management from early stage manufacturing to commercial volume multi-cavity molds and high-speed automated assembly.

Mematec Solutions is a Business Unit of Mematec Products

We offer our clients a competitive device, both in pricing and performance

Last but not least, we are open to offer our clients the possibility of obtaining competitive advantage in the market by providing the option of device exclusivity in determined markets.
