## *Mora Ellipse*

Unit Dose Dry Powder Inhaler

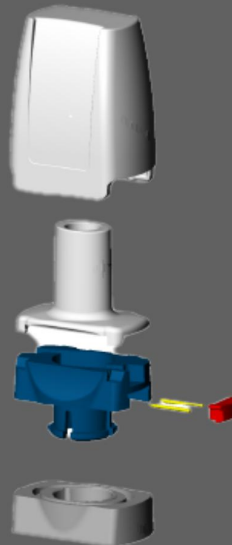

## Why choose MoraEllipse

- Easy capsule loading – very patient-friendly and easy to use
- Smart look and compact design
- Highly customisable with client colours and logo
- It requires no springs to activate the drugs - improves on handling ease and cost efficiency
- Its simple design requires a low number of parts, thus making it cost efficient to produce and assemble
- The design of the device is specially designed to offer a clean and simple end-customer experience, limiting the rate of patient misuse - practically almost impossible to misuse it

Mora Ellipse is a **capsule based Dry Powder Inhaler** with a simple design, that requires no springs to activate the drug. The piercing of the capsule is done by rotating the body base which is fixed in an activator.

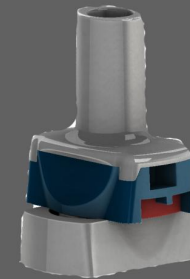

## Mematec Solutions

### Who Are We?

We design and develop inhalation medical devices used in the treatment of COPD – Unit Dose and Multi Dose DPIs.

We also offer **Consulting and Project Management** from early stage manufacturing to commercial volume multi-cavity molds and high-speed automated assembly.

Mematec Solutions is a Business Unit of Mematec Products

It requires only five easy steps to inhalation. Due to its simple intuitive handling, there is no need of any specific training of the patients.

Handling errors are reduced to an absolute minimum and patient satisfaction rates rise exponentially.
